## 1 introduction

## **2 Task Description and Requirements**

### **2.1 Description**

### **2.2 Requirements**

### 3 Prestudy

Methods:

Visualization:

Generating graphs and diagrams representing the program  
Easier to get an overview of program structure and execution

Interactive forwards- and backwards-stepping

two forms: re-execution, state-saving

re-execution: small memory footprint, slow backward stepping

state-save: fast stepping both ways, needs more memory, amount depending on program

Queries:

fast way to check object-relations and -properties

Tools:

GNU debugger (GDB)

tracing, reverse debugging, general debug-stuff

multiplatform, multi-language

remote debugging

CLI-only, needs separate front-end

Jinsight

made by IBM

two components: profiler and visualizer

only for z/OS or Linux on system z

builds a trace when application is running

client connects to profiler and visualizes the trace

modified JVM?

120 minute trace limit

very powerful

Javavis

relies on the Java Debug Interface (JDI), and the Vivaldi Kernel (a visualization library)

shows dynamic behavior of running program

object diagrams+sequence diagram, UML

smooth transitions

not a debugger

code canvas (visual studio)

unites all project-files on a infinite zoomable surface

both content and info

layers of visualization - files/folders, diagrams, tests, editors, traces ++

several layers visible at the same time

search

trace viewer plugin (g-Eclipse)  
g-eclipse=grid, archived project  
visualize and analyze communication of message-passing programs  
standalone/platform independent  
designed for massive parallelism  
debugging  
event markers

Whyline  
Interrogative debugger  
why did, why did not  
works on recorded executions

TOD: Trace-Oriented Debugger  
omniscient debugger  
queries  
dynamic visualizations - high-level, graph of event density

Jive  
combines ale fields  
contour diagram  
sequence diagram  
stepping - state-saving  
queries - enabled by state-saving  
can be used for debugging

## 4 Conclusion

## References
